Gold Equity Price Performance Remains Mixed

- Precious Metals:** Since mid April, the price of gold has fallen 2.5%, and almost hit the \$1,300 per ounce level on Tuesday and Wednesday on the back of downward pressure from further interest rate increases by the Federal Reserve. This is despite continued signs of rising inflation, pressure on tech stocks by the U.S. government, and a looming trade war with China. However, perhaps somewhat unexpectedly, the Federal Reserve kept its key interest rate unchanged which saw gold rise to US\$1,315 per ounce at close Friday afternoon. Despite the late-week gains, gold was down 1%, while silver finished relatively flat. Gold mining and exploration equities mirrored the trend, with both the VanEck Vectors Junior Gold Miners ETF and S&P/TSX Global Gold Index recouping some of the losses incurred over the last couple of weeks, while the S&P/TSX Venture Composite Index continued to struggle, falling to 772 on a Friday. As expected, the performance of individual gold equities was mixed, with Detour Gold (DGC-T, Hold rating, \$16.50 target) regained 7% after heavy losses last week, and Endeavour Mining Corp. (EDV-T, BUY rating, \$32.00 target) which was up 4% this week. On the junior exploration front, Marathon Gold (MOZ-T, BUY rating, \$1.80 target) gained 12% and Pure Gold Mining (PGM-V, BUY rating, \$1.00 target) was up 3% this week. Platinum and palladium prices were lower this week, down 0.5% and 0.2% respectively.
- Base Metals:** Base metals were mixed week over week. LME nickel was the most positively impacted metal up 1.0% WoW, copper was up 0.5% while zinc was down 2.6% WoW. Zinc prices hit their lowest in almost nine months on Friday, as investors expect a narrowing of the global market deficit. The LMEX Index finished the week up 154 bps at 3,339. The S&P Metals & Mining Select Industry Index finished the week at 1,758, which was flat WoW. YoY, metals have had a respectable performance: copper, zinc, and nickel are up 23.1%, 18.7% and 55.8%, respectively. LME inventories were mixed WoW, with copper down -7.8%, zinc down -0.6% and nickel up 2.3% WoW. Excluding bonded warehouse inventories, we calculate the current days of consumption at 12.7 for copper and 9.1 for zinc. The US Dollar Index was up 114 bps this week finishing at 92.58, which had a slight negative impact on base metals prices. Teck Resources (TECK.B:TSX, not rated) has signed annual zinc concentrate supply deals with European smelters Glencore and Nyrstar with treatment charges (TCs) set at a 12-year low of \$147 per tonne, marking a 14.5% drop from last year's level of \$172 per tonne, which will be retroactive to January 1st resulting in positive financial adjustments for zinc producers, in particular Trevali (TV:TSX, BUY, \$2.30/sh target). In our coverage universe, our most positively and negatively impacted weekly performers were Nevsun (NSU:TSX, BUY, \$4.00/sh target) and Copper Mountain (CMMC:TSX, BUY, \$2.00/sh target), up 6.6% and down 8.5%, respectively.
- Week Ahead:** Lucara Diamonds (LUC-T; BUY rating, \$3.20) will report Q1/18 operations data and financial results after-market on Tuesday May 8th, Asanko Gold (AKG-T, HOLD rating; \$2.00) and B2Gold (BTO-T, BUY rating; \$5.00) will report Q1/18 financial results pre-market on Thursday May 10th and Mountain Province Diamond (MPVD-T; BUY rating, \$6.30) will report Q1/18 financial results after-market on Thursday May 10th.

Pierre Vaillancourt, pvaillancourt@haywood.com; Douglas Ibbitsen, CFA, dibbitson@haywood.com

Q1/18 is anticipated to be the weakest quarter of the year, but higher mill throughput and higher recoveries are expected to improve production in future quarters. NexGen Energy Ltd. (NXE-T, \$2.57 [Buy Rating, \$6.00 Target Price]) – Winter Drilling Successful on all Fronts – Expands A2, Increases Confidence in A3

Colin Healey, MBA, chealey@haywood.com; Aazan Habib, ahabib@haywood.com

NexGen has released scintillometer results for 54 holes from its winter drilling program at the 100%-owned Rook-1 project, which hosts the + 300 Mlb U3O8 Arrow deposit. Major objectives of the completed winter 2018 drill program at Rook 1/Arrow include 1) Exploration - confirmation of discovery of the A0 Shear zone, originally discovered in geotechnical hole GAR-17-001 back in October 2017; and, new mineralization registering up to 32,800 cps radioactivity was intersected 160m NW of A0. In addition, uranium mineralization was intersected NE of the A1 and A2 shear zones, confirming Arrow remains open for expansion in these areas. Lastly, in regional exploration NXE intersected a narrow composited interval of strongly mineralized rock at 'South Arrow', located 175m SW of the main Arrow zone, highlighting additional resource potential in this area with further drilling. 2) A3 infill and A2 expansion drilling were successful in confirming and expanding these areas, respectively, as NexGen aims to maximize the 'Indicated' resources for integration into the upcoming Pre-Feasibility Study (PFS), expected in late Q3/early Q4`18.

Tahoe Resources Inc. (THO-T, Taho-N; \$6.52 [Sell Rating, \$5.50 Target Price]) – Q1/18 - Gold Division Performance Lags But Inventory Sales Bolster Financial Performance

Geordie Mark, PhD, FAusIMM, gmark@haywood.com; Alvin Islam, GIT, aislam@haywood.com

Tahoe reported Q1/18 financial and operating results. Gold production missed our expectations on lagging output from the Timmins assets. However, higher than anticipated gold sales from inventory drove financials in-line despite heightened operating expenses and care and maintenance costs at Escobal. With the recent strike at La Arena now resolved, the primary drag continues to revolve around the ongoing inactivity at Escoba.

Xanadu Mines Ltd. (XAM-ASX, A\$0.19 [Not Rated]) – Further Drilling at Newly Discovered Zaraa Prospect

Mick Carew, PhD, mcarew@haywood.com; Emma Boggio, MSA, CPA, CA, eboggio@haywood.com

Northern Empire Resources (NM-V, \$1.40 [Not Rated]) – Step-out Drilling Highlights Expansion Potential at Daisy and Secret Pass

Mick Carew, PhD, mcarew@haywood.com; Emma Boggio, MSA, CPA, CA, eboggio@haywood.com

Rating Structure

Each company within an analyst's universe, or group of companies covered, is assigned: (i) a recommendation or rating, usually BUY, HOLD, or SELL; (ii) a 12 month target price, which represents an analyst's current assessment of a company's potential stock price over the next year; (iii) an overall risk rating which represents an analyst's assessment of the company's overall investment risk; and (iv) specific risk ratings or risk profile parameters which in their aggregate support an analyst's overall risk rating. These ratings are more fully explained below. Before acting on our recommendation we caution you to confer with your Haywood investment advisor to determine the suitability of our recommendation for your specific investment objectives, risk tolerance and investment time horizon.

Recommendation Rating

BUY – The analyst believes that the security will outperform other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) BUY rating.

HOLD – The analyst believes that the security is expected to perform in line with other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) HOLD rating.

SELL – Investors are advised to sell the security or hold alternative securities within the sector. Stocks in this category are expected to under-perform other companies on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) SELL rating.

TENDER – The analyst is recommending that investors tender to a specific offering for the company's stock.

RESEARCH COMMENT – An analyst comment about an issuer event that does not include a rating or recommendation.

UNDER REVIEW – Placing a stock Under Review does not revise the current rating or recommendation of the analyst. A stock will be placed Under Review when the relevant company has a significant material event with further information pending or to be announced. An analyst will place a stock Under Review while he/she awaits sufficient information to re-evaluate the company's financial situation.

COVERAGE DROPPED – Haywood Securities will no longer cover the issuer. Haywood will provide notice to clients whenever coverage of an issuer is discontinued.

Haywood's focus is to search for undervalued companies which analysts believe may achieve attractive risk-adjusted returns. This research coverage on potentially undervalued companies may result in an outweighed percentage of companies rated as BUY. Management regularly reviews rating and targets in all sectors to ensure fairness and accuracy.
