Metal Prices Plunge further as Gold falls Below \$1,200 per Ounce

- Precious Metals:** The week started on an ominous note as the price of gold fell below the US\$1,200 level for the first time in over 18 months, experiencing its biggest weekly fall in 18 months as the U.S. dollar continued to rise relative to other global currencies. The U.S. Dollar Index rose to 96.7 on Thursday before pulling back slightly on Friday. Ongoing concerns over U.S. and Chinese tariffs, and the imposition of sanction on Turkey saw investors continue to buy U.S. dollars, while gold suffered as a safe-haven asset. As expected, the plunging gold price, plus its fall below the psychological US\$1,200 level was bad news for gold mining and exploration equities. Heavy losses were realized for a number of key indices; the S&P/TSX Global Gold Mining Index fell 15 points this week, while the VanEck Vectors Junior Mining Index lost almost 3 points, approximately 10%. Given the scale of the pullback, there were few positive performers for the week, with both Lundin Gold Inc. (LUG-T, BUY rating, \$7.75 target; up 1.5%) and Lumina Gold Corp. (LUM-T, BUY rating, \$1.20 target; up 1.3%) two notable exceptions. The price of gold finished at US\$1,185 per ounce on Friday, while silver (down 3.3%) and platinum (down 4.6%) also finished lower, finishing at US\$14.80 per ounce and US\$790 per ounce respectively. Palladium rose slightly (up 0.1%) to finish at US\$911 per ounce.
- Base Metals:** Base metals were all down this week, as the trade war and concerns over emerging market demand continue to negatively impact the metals. LME zinc was the most negatively impacted metal, down -6.3% WoW, which mark the worst weekly loss since 2016 for zinc followed by LME copper and LME nickel, down -4.4% and -2.5% WoW, respectively. The LMEX Index finished the week down -4.3% WoW at 2,877.9. The S&P Composite Diversified Metals & Mining Industry Index finished the week at 5,260, which was down -7.5% WoW. YoY, metals have had a mixed performance: copper and zinc are down -8.8% and -21.7%, respectively while LME nickel is up 25.5% YoY. LME inventories were mixed WoW, with copper and zinc inventories up +2.1% and +8.9% WoW, respectively while LME nickel inventories were down -1.2% WoW. The US Dollar Index was up 16 bps this week finishing at 96.2, having a minimal impact on base metals prices. Base metals equities were all negatively impacted by the metals prices. The most negatively impacted weekly performers in our coverage universe were Capstone Mining (CS:TSX, HOLD, C\$1.20/sh target) and Hudbay Minerals (HBM:TSX, BUY, C\$9.00/sh target), which were down -18.2% and -10.0% WoW, respectively.

Haywood Research: The Week in Review – Covered Companies

Publications from the Haywood Research team for the week included the following for covered companies:

- **Copper Mountain Mining Corp. (CMMC-T, C\$1.13):** Drilling results
- **Osisko Mining Inc. (OSK-T, \$1.65):** Acquisition announcement
- **RNC Minerals (RNX-T, C\$0.09):** Q2/18 financial results
- **Atlantic Gold Corp. (AGB-V, \$1.58):** Q2/18 financial results
- **Mountain Province Diamonds Inc. (MPVD-T, \$2.52):** July operations summary
- **Pure Gold Mining Inc. (PGM-V, \$0.55):** Drilling results
- **Roxgold Inc. (ROXG-T, \$0.88):** Q2/18 financial results
- **Liberty Gold Corp. (LGD-T, \$0.42):** Drilling results

Covered Name Reports:

[Copper Mountain Mining Corp. \(CMMC-T, C\\$1.13 \[Buy Rating, C\\$2.00 Target Price\]\) – Drill Results Consistent with Previous Drilling at New Ingerbelle](#)

Pierre Vaillancourt, pvaillancourt@haywood.com; Douglas Ibbitson, CFA, dibbitson@haywood.com

Results from 8 holes included 0.6% Cu Eq (0.45% Cu, 0.52g/t Au) over 102m, 0.59% CuEq (0.41% Cu, 0.57g/t Au) over 84m, and 0.49% Cu Eq (0.33% cu, 0.7g/t Au) over 93m, were consistent with previous drilling, featuring higher gold grades relative to the Copper Mountain Mine. The deposit remains open to the south, and drilling extended the resource at depth. Phase 2 drilling is now complete, and final results are expected in a few weeks. The Company then plans on completing an updated resource estimate by the end of Q3/18, before deciding on a plan for Phase 3 drilling.

[Osisko Mining Inc. \(OSK-T, \\$1.65 \[Buy Rating, \\$4.50 Target Price\]\) – Osisko to Acquire Beaufield Resources](#)

Mick Carew, PhD, mcarew@haywood.com; Emma Boggio, MSA, CPA, CA, eboggio@haywood.com

Osisko announced that it will purchase the remaining issued and outstanding shares in the Canadian mineral exploration company, Beaufield Resources (BFD-V, Not Rated). Prior to this announcement, Osisko owned approximately 26% of the company's outstanding shares. Of Beaufield's five primary properties, one is located in Ontario (Hemlo) and four are in Quebec (Urban, Eléonore-Opinaca, Tortigny, and Launay). Most notable of these projects is the company's Urban-Windfall project, located adjacent to Osisko's Windfall/Lynx project. Under the terms of the Arrangement Agreement, Beaufield shareholders will receive 0.0482 of a common share of Osisko in exchange for each Beaufield share held. The Arrangement will require the approval of Beaufield shareholders at a special meeting anticipated to be held in October 2018.

RNC Minerals (RNX-T, C\$0.09 [Hold Rating, C\$0.15 Target Price]) – Weak Q2/18 as Expected – Focus Remains on Beta Hunt Sale and Dumont

Pierre Vaillancourt, pvaillancourt@haywood.com; Douglas Ibbetson, CFA, dibbitson@haywood.com

RNC Minerals reported Q2/18 earnings from continuing operations of \$0.02 and cash flow of \$0.00, compared to our estimates of breakeven for both metrics. If we count the contribution from discontinued operations, the Company had a loss of (\$0.00) for the quarter. In Q2/18, RNC reported revenue of only \$10M and EBITDA of \$9M. In Q1/18, the Company reported a loss of (\$0.01) from continuing operations and negative CFPS of (\$0.00). RNC reported cash of \$7M in Q2/18, however, most of that amount is tied to the Dumont nickel joint venture with Waterton. The Company has less than \$2M in available cash and total debt of \$27M. Management expects to meet debt obligations through future cash flow from the Beta Hunt mine until its sale, and thereafter, from sale proceeds.

Atlantic Gold Corp. (AGB-V, \$1.58 [Hold Rating, \$1.80 Target Price]) – Q2/18 Financials Ahead of Expectations on Lower Unit Costs

Geordie Mark, PhD, FAusIMM, gmark@haywood.com; Alvin Islam, GIT, aislam@haywood.com

Production from operations delivered 22,269 ounces via the processing of 567.2 kt of ore material grading 1.28 g/t gold with gold recoveries reported at 95.2%. Q2/18 gold production was higher than Q1/18 and guidance for the quarter, however, lower than the annualized rate delivered in March due to processing of lower grade material during the latest quarter. Average plant head grades were reportedly 11% below reserve grade due to unexpected limitations to accessing higher grade zones resulting from the presence of historical tailings that needed to be moved thus preventing exploitability of higher grade zones for a period of eight weeks: access was regained at these zones by the end of June.

Mountain Province Diamonds Inc. (MPVD-T, \$2.52 [Buy Rating, \$6.30 Target Price]) – 6th Sale Proceeds Slowdown as July Production Reaches New

Geordie Mark, PhD, FAusIMM, gmark@haywood.com; Alvin Islam, GIT, aislam@haywood.com

6th diamond sales declined on softer diamond pricing. Meanwhile, July production yielded highest carat recoveries to date on elevated throughput and grades. Operations data for Gahcho Kué outlined diamond production that well exceeded our daily normalized production for Q3/18 with 709 kct produced in the month versus our normalized value of 584 kct for the 31-day period. Total diamond production of 709 kct (+5% MoM) equates to a diamond production rate of 8.35 Mct/Yr, which materially exceeds our expectations for annual production of 6.9 Mct, and notably impressed on elevated throughput of 299 kt (or ~3.5 Mtpa). MoM data show a 2% increase in throughput rates, and marginally higher process grades of 2.37 ct/t resulting in a MoM 5% increase in diamond production. Processing of higher grade material continued as kimberlite was sourced from higher grade regions in the 5034 and the Hearne Pit. However, of particular note is that Hearne diamond recovery shows the return of reportedly higher grades than expected, but with yields showing finer distributions that collectively may translate to lower than expected revenue per tonne projections. Year-to-date diamond production stands at 4.28 Mct, and we believe the Company's 2018 guidance of 6.3-6.6 Mct and 3.1 Mt will be surpassed. For the full year, we project 6.97 Mct in production and 3.3 Mt in plant throughput at an average process grade of 2.13 ct/t.

Pure Gold Mining Inc. (PGM-V, \$0.55 [Buy Rating, \$1.00 Target Price]) – Wedge Target Continues to Advance

Mick Carew, PhD, mcarew@haywood.com; Emma Boggio, MSA, CPA, CA, eboggio@haywood.com

Pure Gold released assay results from further surface drilling at its Madsen Gold Project in Ontario. The release consists of results from 11 additional surface drill holes with 10 targeting the Company's Wedge Zones, where gold mineralization occurs over a ~1.1 km of strike length and to a depth of 500 metres. The Wedge Target is located approximately three kilometres by road south of the Madsen milling infrastructure, forms a southward extension of the mineral system which hosts the Madsen and Fork deposits and defines a structural corridor extending over a five kilometre strike length.

See Haywood Securities for the full report

Roxgold Inc. (ROXG-T, \$0.88 [Buy Rating, \$1.90 Target Price]) – Q2/18 Financials In-Line; Yaramoko Continues to Maintain Strong Margins

Geordie Mark, PhD, FAusIMM, gmark@haywood.com; Alvin Islam, GIT, aislam@haywood.com

Q2/18 gold production of 35,828 ounces and gold sales of 35,320 ounces drove financials to remain in-line with our estimates and consensus. Revenues of US\$45.8 million (from gold sales of 35,320 ounces at US\$1,296 per ounce) drove EPS of \$0.03/sh, operating cash flow (before WC) of US\$0.06 per share, which remained in-line with our expectations of revenue of US\$46 million (consensus of US\$46.1 million), EPS of \$0.02/sh (consensus of \$0.03/sh) and operating cash flow of US\$0.06 per share (consensus of \$0.06/sh). Driving the broadly in-line performance were reported total cash costs of US\$483/oz gold, modestly above (7%) our expectations of US\$451/oz gold, however, resulted in mine operating margins of US\$813/oz gold. AISC of US\$718/oz gold were marginally higher (2%) than our estimates of US\$704/oz gold.

See Haywood Securities for the full report

Liberty Gold Corp. (LGD-T, \$0.42 [Buy Rating, \$1.00 Target Price]) – Drilling Testing Historic Waste Material at Goldstrike

Mick Carew, PhD, mcarew@haywood.com; Emma Boggio, MSA, CPA, CA, eboggio@haywood.com

Following the Company's maiden PEA for Goldstrike released last month, the Company began drill testing historic heap leach pads, stockpiles, waste dumps and pit backfill, in areas mostly within the PEA pit that were classified as waste in the model. The results indicate that surface material created during the historic mining operation (during a period of low gold prices and much higher ore-to-waste cut-off grades) could be added to the current resource and mine plan outlined in the PEA for Goldstrike. We note the maiden PEA for Goldstrike returned an NPV_(5%) and IRR of US\$129.5 million and 29.4% respectively from a resource of 925,000 ounces at 0.50 g/t in the indicated category and 296,000 ounces at 0.47g/t gold inferred using a 0.20 g/t cut-off.

Haywood Research: The Week in Review – Uncovered Companies

News from the Junior sector this week included the following for uncovered companies:

- **Sable Resources Ltd. (SAE-V, \$0.27):** Drilling results

Mining Flashes:

Sable Resources Ltd. (SAE-V, \$0.255 [Not Rated]) – Further Drilling Along Margarita Vein Confirms Continuity

Mick Carew, PhD, mcarew@haywood.com; Emma Boggio, MSA, CPA, CA, eboggio@haywood.com

Sable Resources announced assay results from two additional drill holes targeting the Margarita Vein at the Company's Margarita Project in Chihuahua state, Mexico. The project is situated approximately 12 kilometres northwest of Sunshine Silver Corp.'s (Private) Los Gatos silver mine (Measured and Indicated 9.2 million tonnes resource containing 178 million ounces silver-equivalent). The recent release is comprised of drill holes M-DDH-18-07 and M-DDH-18-08, which are located on the same section line as previously released drillhole M-DDH-18-05 and drillhole M-DDH-18-06. The two recent holes were designed to test the extent and grade of the Margarita structure from surface to 80 metres down dip.

Rating Structure

Each company within an analyst's universe, or group of companies covered, is assigned: (i) a recommendation or rating, usually BUY, HOLD, or SELL; (ii) a 12 month target price, which represents an analyst's current assessment of a company's potential stock price over the next year; (iii) an overall risk rating which represents an analyst's assessment of the company's overall investment risk; and (iv) specific risk ratings or risk profile parameters which in their aggregate support an analyst's overall risk rating. These ratings are more fully explained below. Before acting on our recommendation we caution you to confer with your Haywood investment advisor to determine the suitability of our recommendation for your specific investment objectives, risk tolerance and investment time horizon.

Recommendation Rating

BUY – The analyst believes that the security will outperform other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) BUY rating.

HOLD – The analyst believes that the security is expected to perform in line with other companies in their sector on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) HOLD rating.

SELL – Investors are advised to sell the security or hold alternative securities within the sector. Stocks in this category are expected to under-perform other companies on a risk adjusted basis or for the reasons stated in the research report the analyst believes that the security is deserving of a (continued) SELL rating.

TENDER – The analyst is recommending that investors tender to a specific offering for the company's stock.

RESEARCH COMMENT – An analyst comment about an issuer event that does not include a rating or recommendation.

UNDER REVIEW – Placing a stock Under Review does not revise the current rating or recommendation of the analyst. A stock will be placed Under Review when the relevant company has a significant material event with further information pending or to be announced. An analyst will place a stock Under Review while he/she awaits sufficient information to re-evaluate the company's financial situation.

COVERAGE DROPPED – Haywood Securities will no longer cover the issuer. Haywood will provide notice to clients whenever coverage of an issuer is discontinued.

Haywood's focus is to search for undervalued companies which analysts believe may achieve attractive risk-adjusted returns. This research coverage on potentially undervalued companies may result in an outweighed percentage of companies rated as BUY. Management regularly reviews rating and targets in all sectors to ensure fairness and accuracy.

Overall Risk Rating

Very High Risk: Venture type companies or more established micro, small, mid or large cap companies whose risk profile parameters and/or lack of liquidity warrant such a designation. These companies are only appropriate for investors who have a very high tolerance for risk and volatility and who are capable of incurring temporary or permanent loss of a very significant portion of their investment capital.

High Risk: Typically micro or small cap companies which have an above average investment risk relative to more established or mid to large cap companies. These companies will generally not form part of the broad senior stock market indices and often will have less liquidity than more established mid and large cap companies. These companies are only appropriate for investors who have a high tolerance for risk and volatility and who are capable of incurring a temporary or permanent loss of a significant loss of their investment capital.

Medium-High Risk: Typically mid to large cap companies that have a medium to high investment risk. These companies will often form part of the broader senior stock market indices or sector specific indices. These companies are only appropriate for investors who have a medium to high tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.

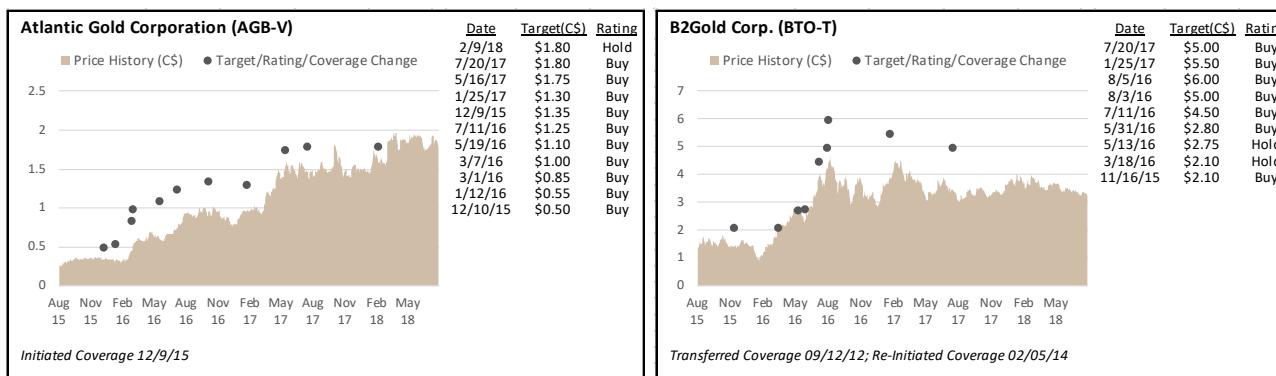

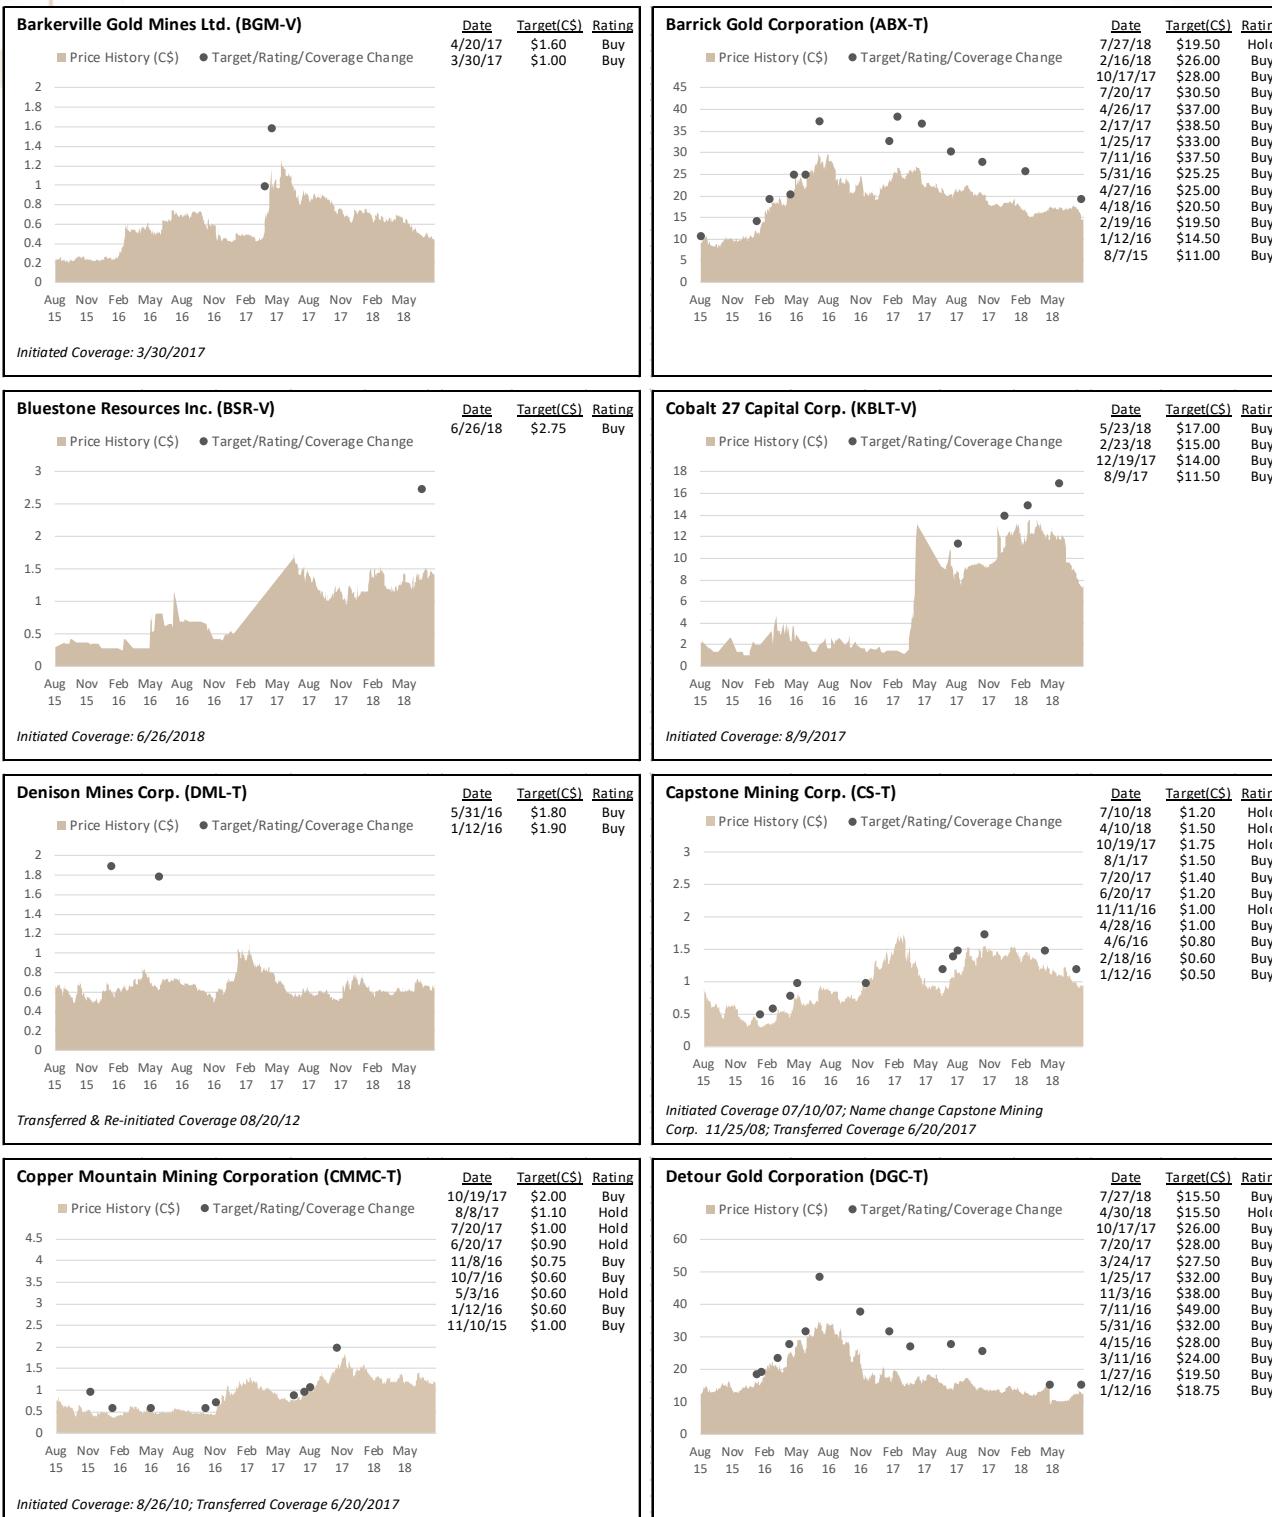

Moderate Risk: Large to very large cap companies with established earnings who have a track record of lower volatility when compared against the broad senior stock market indices. These companies are only appropriate for investors who have a medium tolerance for risk and volatility and who are prepared to accept general stock market risk including the risk of a temporary or permanent loss of some of their investment capital.
