

## Marathon Gold (MOZ CN) - Updated resource improves confidence in estimates ahead of upcoming PFS

Sentiment Indicator : neutral

Produced by Mihaljevic, Mark (RBC Dominion Securities Inc.) on Monday, January 20, 2020, 08:59 AM ET

Disseminated on Monday, January 20, 2020, 09:01 AM ET

We expect a relatively neutral reaction from Marathon's shares to the resource update at the company's Valentine Lake gold project in Newfoundland. Overall, M&I resources continued to grow (+400 Koz) although the total resource and average grade were very slightly lower (~4% each) than the prior estimate. That being said, we view this as a fundamentally higher quality resource following an additional ~60,000 m of infill drilling (~270,000 m drilled to date) with drill spacing down to 10-15 m on 10 m sections in the core mineralized areas, more restrictive capping including both a hard cap and tighter search restrictions on the threshold cap, as well as refined geological models and mineralized domains. Management reiterated expectations that the upcoming Pre-Feasibility Study (PFS) will exclude development of the heap leach operation and noted the mine plan will only incorporate in-pit resources from the Marathon and Leprechaun deposits (combined M&I resource of ~2.8 Moz). We expect the key focus for investors to be results of the upcoming PFS which remains on track for Q2/20.

Exhibit 1: Updated resource reflects ongoing infill drilling, more restrictive capping, and refined geological models
